

Loan Command

Loan Command is a completely secure, cloud-based customer relationship pricing application that can be accessed online, with your smartphone or tablet.

POWER

There are lots of moving parts in loans which is why your lenders need to be equipped with the same power and intelligence that the large regional and multinational banks have. Loan Command quickly allows your lenders to quickly analyze hundreds of variables in order to reach a quick decision.

INTELLIGENCE

Not only does Loan Command give you a quantitative basis for decisions, but it also suggests structuring ideas based on inputs and driven by the collective experience of thousands of users.

VISION

Think of Loan Command as a steering wheel for your financial institution. You know where you are going, Loan Command now gives you the roadmap to get there - loan-by-loan, deposit-by-deposit, and fee-by-fee.

REDUCE RISK

Loan Command not only takes into account the latest credit risk information into pricing but provides you with predictive analytics to forecast the loan's expected loss. The result is more confidence in the field and more loans that management wants.

PIPELINE MANAGEMENT

Loan Command has a complete pipeline management system that forecasts, by lender and area, what loans will get closed and when. Learn why your bank is losing, and winning relationships.

PRICING

Pricing is simple and low risk - \$80 per month per business development officer - that is it, nothing upfront, easy to budget and no extra charges. There is no obligation and your financial institution can cancel at any time. That is a pretty easy decision for the latest in relationship profitability.
